

# Technician High-Frequency Technology (m/f/x)

Astyx Satcom GmbH, Ottobrunn

## About Us

We are a dynamic, innovative, and fast-growing satellite communications company based in Ottobrunn. As a leading supplier of components for high-frequency signal amplifiers, we are developing the foundation for the satellite-based Internet of the future as well as a future 6G standard. Our unique products significantly increase the output power of signal amplifiers for satellite communications, enabling high-performance and energy-efficient data connections between ground stations and satellites.

## Your Tasks

- Assembly and commissioning of complex electronic circuits for prototypes and series production
- Tuning microelectronic modules for high-frequency applications using cutting-edge measurement technology
- Measuring RF circuits with network and spectrum analyzers
- Supporting development and production teams to continuously improve products
- Optimizing manufacturing processes and measuring procedures

# Technician High-Frequency Technology (m/f/x)

Astyx Satcom GmbH, Ottobrunn

## Your Profile

- Trained as a master or technician in the fields of Electronics, Mechatronics, or Information/Systems Technology (Lateral entry also possible under certain conditions)
- Knowledgeable and experienced with RF technology
- Proficient at using spectrum and network analyzers (advantageous)
- Competent in microelectronic assembly technology and experienced in working with microelectronic components (advantageous)
- Enjoy fine-motor tasks
- Confident with Microsoft Office
- Work independently, detail-oriented, and with a high level of awareness for quality results.
- Responsible and cooperative team player

## We Offer

- A young, dynamic, fast-growing business
- The opportunity to build key components for future satellite-based internet (VHTS, LEO constellations) and 6G
- A flat hierarchy and cooperative work environment
- Job security
- Flexible work schedules (flextime)
- Comprehensive training and further individual educational opportunities
- An office on a campus in the heart of Munich's aerospace industry with modern equipment and a rooftop terrace
- Free coffee/beverages and subsidized lunches
- Membership to Body&Soul fitness centers
